SOFTWARE ENGINEERING | BACKEND DEVELOPMENT

PROFILE

Computer Science undergraduate focused on backend engineering and software development, with hands-on experience building APIs, integrating application components, and contributing to open-source projects. Strong problem-solving foundation with 350+ LeetCode problems solved; interested in building reliable, scalable products.

EDUCATION

B.E. Computer Science and Engineering | Bannari Amman Institute of Technology
Graduation: 2028 | CGPA: 8.85/10
CBSE Class XII: 94% | CBSE Class X: 96.4%

TECHNICAL SKILLS

Programming: Java, Python, C, JavaScript, SQL
Backend & Web: FastAPI, Node.js, React.js, REST APIs, HTML5, CSS3
Databases & Tools: PostgreSQL, SQLite, ChromaDB, Git, GitHub, Docker, Postman
AI/ML: LangChain, Hugging Face, Scikit-learn, TensorFlow, PyTorch

EXPERIENCE

AI/ML Intern | Qibr Technologies | Current

- Contributing to an AI-powered interior CAD-generation solution, with a focus on backend development and API integration.
- Developing backend APIs that connect application components and support the interior design/CAD-generation workflow.
- Collaborating with the team to implement, test, and debug backend functionality using Python, Docker and Git.

OPEN-SOURCE CONTRIBUTIONS

swfactory | PR #2409 – Merged

- Implemented post-demo CLI guidance and added regression tests, helping users understand the next steps after running a demo.

OpenClaw | PR #195051 – Submitted

- Worked on a gateway chat-metadata lifecycle issue; added regression coverage for preserving publication failures during catch-up refresh.

SELECTED PROJECTS

SafeExec | AI-Based Linux Command Safety Engine | github.com/Rishiiitha/safeexec-infiniteLoops

- Built a multi-layer command risk analysis pipeline using deterministic rules, a local XGBoost model, and LLM fallback; added risk-aware decisions and SQLite caching.

Student Support Voicebot | Backend Developer | github.com/Rishiiitha/Personalised-voicebot

- Built a FastAPI-based RAG backend with PostgreSQL/pgvector, document processing, conversational APIs, and Google OAuth/JWT authentication.

LEADERSHIP & STRENGTHS

Leadership: Managed a 20-member student team for academic and skill-development activities; led a 5-member team on an AI-workforce project.
Soft Skills: Communication, leadership, teamwork, collaboration, and problem-solving.

ACHIEVEMENTS

- Solved 350+ unique problems on LeetCode.
- Oracle Cloud Infrastructure 2025 Certified; Oracle Data Platform 2025 Foundations Associate.
- Neurohack 2026 Finalist.
